

30 August 2018

Dear Sir/Madame,

I am writing to recommend Mr. Abo-Mohana to your selection committee. As a partner in the upcoming “Play to Learn Accounting” digital project, I have found him to be a committed developer, an engaged learning advocate, and a fair-minded, techsavvy, with advanced practical and professional experience.

To date, my interactions with Mr. Abo-Mohana have primarily been remote, via Skype or Google Hangouts. However, the past several years of collaboration have given me considerable insight into his commitment to the field of IT and to raising outcomes using novel approaches. One such approach, documented in the upcoming online course “Play and Learn Accounting,” incorporates a scenario-based approach to teaching accounting and financial management principles, particularly to students without prior work experience. The online course is being undertaken due to the impressive student outcomes data.

In addition, I would like to add my appreciation for his generous and committed attitude generally, and toward the pursuit of learning, in particular. It is quite inspiring to work with a professional whose grasp of business, research, and technological tools is solid - I believe that these are Mr. Abo-Mohana’s key assets and that they would benefit any institution with which he is affiliated.

Sincerely,

Dr Muhammad Al Mahameed BA(Hons), MSc, FHEA  
Teaching Fellow in Accounting
